22nd April 2016

To whom it may concern:

I am pleased to confirm that Nikolaos Kyparissas, Technical University of Crete, was a finalist in the Xilinx University Program Open Hardware 2015 design contest, in the FPGA category, for the project: Game of Complex Life.
There were over 100 entries to the competition, and Nikolaos was one of only 12 finalists across all categories.
Please contact me if any further information is required.
